## 1. INTRODUCTION

This report summarizes findings from the Arkansas Prevention Needs Assessment Survey (APNA), a survey of $6^{\text {th }}, 8^{\text {th }}, 10^{\text {th }}$ and $12^{\text {th }}$ grade school students, conducted in the fall of 2020. This survey was available free of charge to all Arkansas public school districts that chose to participate. The survey was designed to assess adolescent substance use and related behaviors, and risk and protective factors that predict these behaviors. In this report, the results are presented for each grade along with the overall results for the State. Table 1.1 provides information on the total number of students and the number of students in the county. Table 1.2 provides information on the number and percent of students at each grade. Table 1.3 provides information on the number and percent of students by sex. Table 1.4 provides information on the number and percent of students by ethnic origin.

The APNA Survey was first administered in the fall of 2002 and has been administered in the fall of each school year since then. Because trends over time are very important to prevention planning, readers are encouraged to review the results from the previous surveys. By comparing the results of the previous surveys, changes in ATOD (alcohol, tobacco and other drugs) use, rates of ASB (antisocial behavior), and levels of risk and protective factors can be determined for a specific grade. It is important to note that the results in this report are for students who were not sampled in the even grades ( $6,8,10$, and 12) during the previous year's survey. Those students are now in grades 7, 9, 11 or are out of school. Together, the results of the current and past APNA surveys provide a complete picture of ATOD use, antisocial behavior, risk, and protection for students in Arkansas.

### 1.1 The Risk and Protective Factor Model of Prevention

Risk and protective factor-focused prevention is based on a simple premise: To prevent a problem from happening, we need to identify the factors that increase the risk of that problem developing and then find ways to reduce the risks. Just as medical researchers have found risk factors for heart attacks such as diets high in fats, lack of exercise, and smoking, a team of researchers, the Social Development Research Group (SDRG), at the University of Washington, have defined a set of risk factors for drug abuse. The research team also found that some children exposed to multiple risk factors manage to avoid behavior problems later even though they were exposed to the same risks as children who exhibited behavior problems. Based on research, they identified protective factors and processes that work together to buffer children from the effects of high risk exposure and lead to the development of healthy behaviors.

Risk factors include characteristics of school, community, and family environments, as well as characteristics of students and their peer groups that are known to predict increased likelihood of drug use, delinquency, and violent behaviors among youth ${ }^{1}$.
(Methods Note Regarding Long-Term Trend Data:)
Reports for the 2020 Arkansas Prevention Needs Assessment Survey were posted during the first week of March. During the third week of March, a code error resulting to non-standard procedures being used for calculating scores on the risk and protective factor questions was discovered. On further examination, it was discovered that this error had also been inadvertently used in 2017, 2018, 2019 reports. The variation in these procedures related to how missing data (i.e., instances where the student did not respond to a question) were counted. The effect was lowered calculated scores for some risk and protective factor prevalence estimates.

In this report, the computational methods used for the risk and protective factor score calculations have been adjusted to match standard score calculation procedures. In addition, to produce the most accurate long-term trend data possible, the 2017, 2018 and 2019 scores have been recalculated utilizing standard procedures.

Data for substance use and all other variables, other than the risk and protective factor scale, were unaffected by the non-standard procedures mentioned above, as the Risk and Protective Factor scores are calculated separately from the rest of the statistics in the report.

[^0]An impact assessment will be performed to further examine the scope of the change and will be made available once completed. Preliminary review suggests that overall impact on existing trends and prevention efforts will be minimal. The impact assessment will seek to verify the initial review.

### 1.2 The COVID-19 Pandemic Impact on the 2020 APNA Survey

In fall 2020, schools and districts across Arkansas and the United States struggled with COVID-19 impacts and the re-opening of schools, remote learning, and hybrid learning environments for students in grades K-12. In Arkansas, compared with previous years, fewer districts were able to participate in the 2020 APNA. For those who did participate, administrators had less control over the survey environment, resulting in more incomplete and fewer surveys (50\% fewer statewide) than in past years. Despite these challenges, APNA was successfully administered and the resulting data can inform efforts to continue work in building safe learning environments for Arkansas students.

As you read and make use of the data in this report, please keep in mind a few impacts of these unique learning and testing environments driven by the pandemic:

1. Comparisons between 2020 and previous years should be assessed with caution; for counties with low levels of responses, the results can be interpreted as trends that can be verified with future data.
2. The specific participating schools in each county were often different between 2019 and 2020; comparisons between annual data should consider this differential when seeking comparisons.
3. For most counties, the data remain reliable and representative of general substance use and other behaviors of the students in your county.

Also, to provide data on the impact of the pandemic, the 2020 APNA includes a battery of survey items to gather data on the students' perspectives on: safety for returning to school during the pandemic; preference for online vs learning in school; remote access to school services; relationships and homelife during the pandemic; social distancing practices; and feelings of depression during the pandemic. This snapshot will assist Arkansas' educators in understanding how the pandemic has affected the learning environment and the students who access it.

## 2. TOOLS FOR ASSESSMENT AND PLANNING

Protective factors exert a positive influence or buffer against the negative influence of risk, thus reducing the likelihood that adolescents will engage in problem behaviors. Protective factors, identified through research reviewed by the Social Development Research Group, include social bonding to family, school, community and peers; and healthy beliefs and clear standards for behavior.

Research on risk and protective factors has important implications for prevention efforts. The premise of this approach is that in order to promote positive youth development and prevent problem behaviors, it is necessary to address those factors that predict the problem. By measuring risk and protective factors in a population, specific risk factors that are elevated and widespread can be identified and targeted by preventive interventions that also promote related protective factors. For example, if academic failure is identified as an elevated risk factor in a community, then mentoring and tutoring interventions can be provided that will improve academic performance, and also increase opportunities and rewards for classroom participation

Risk and protective factor-focused drug abuse prevention is based on the work of J. David Hawkins, Ph.D., Richard F. Catalano, Ph.D.; and a team of researchers at the University of Washington in Seattle. Beginning in the early 1980's, the group researched adolescent problem behaviors and identified risk factors for adolescent drug abuse and delinquency. The chart below shows the links between the 16 risk factors and the five problem behaviors. The check marks have been placed in the chart to indicate where at least two well designed, published research studies have shown a link between the risk factor and the problem behavior.

|  | PROBLEM BEHAVIORS |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| YOUTH AT RISK |  |  | ¢ |  |  |

Community

## 3. SCHOOL IMPROVEMENT USING SURVEY DATA

Data from the Arkansas Prevention Needs Assessment Survey can be used to help school and community planners assess current conditions and prioritize areas of greatest need.

Each risk and protective factor can be linked to specific types of interventions that have been shown to be effective in either reducing the risk(s) and enhancing the protection(s). The steps outlined below will help your school and community make key decisions regarding allocation of resources, how and when to address specific needs, and which strategies are most effective and known to produce results.

### 3.1 What are the numbers telling you?

Review the charts and data tables presented in this report. Using the table in section 3.3, note your findings as you discuss the following questions

- Which 3 to 5 risk factors appear to be higher than you would want?
- Which 3 to 5 protective factors appear to be lower than you would want?
- Which levels of 30 day drug use are increasing and/or unacceptably high?
- Which substances are your students using the most?
- At which grades do you see unacceptable usage levels?
- Which levels of antisocial behaviors are increasing and/or unacceptably high?
- Which behaviors are your students exhibiting the most?
- At which grades do you see unacceptable behavior levels?

### 3.2 How to decide if a rate is "unacceptable."

- Look across the charts to determine which items stand out as either much higher or much lower than the others
- Compare your data to statewide data and national data. Differences of $5 \%$ or more between the local and other data should be carefully reviewed.
- Determine the standards and values held in your area. For example: Is it acceptable in your community for $75 \%$ of high school students to drink alcohol regularly even when the statewide percentage is 90 ?

### 3.3 Use these data for planning:

- Substance use and antisocial behavior data - raise awareness about the problems and promote dialogue.
- Risk and protective factor data - identify exactly where the community needs to take action
- Promising approaches - talk with resources listed on the last page of this report for ideas about programs that have been proven effective in addressing the risk factors that are high in your area, and in improving the protective factors that are low.

| Measure | Unacceptable <br> Rate \#1 | Unacceptable <br> Rate \#2 | Unacceptable <br> Rate \#3 | Unacceptable <br> Rate \#4 |
| :--- | :---: | :---: | :---: | :---: |
| 30 Day <br> Drug Use |  |  |  |  |
| Antisocial <br> Behavior |  |  |  |  |
| Risk <br> Factors |  |  |  |  |
| Protective <br> Factors |  |  |  |  |

## How do I decide which intervention(s) to employ?

- Strategies should be selected based on the risk factors that are high in your community and the protective factors that are low.
- Strategies should be age appropriate and employed prior to the onset of the problem behavior
- Strategies chosen should address more than a single risk and protective factor.
- No single strategy offers the solution.

How do I know whether or not the intervention was effective?

- Participation in the annual administration of the survey provides trend data necessary for determining the effectiveness of the implemented intervention(s) and also provides data for determining any new efforts that are needed.

4. HOW TO READ THE CHARTS AND TABLES
5. Student responses for risk and protective factors, substance use and antisocial behavior questions are displayed by grade on the following pages.
6. The factors are grouped into 4 domains: community, family, school, and peerindividual.
7. The bars represent the percent of students in the grade who reported elevated risk or protection, substance use, antisocial behaviors or school safety concerns.
8. Scanning across these charts, you can easily determine which factors are most (or least) prevalent, thus identifying which are the most important for your community to address.
9. Bars will be complemented by a small dash. The dash shows the comparison from the state and provides additional information for you in determining the relative importance of each risk or protective factor.
10. A dashed line on each risk and protective factor chart represents the percentage of youth at risk or with protection for the seven state sample upon which the cut-points were developed. The seven states included in the norm group were Colorado, Illinois, Kansas, Maine, Oregon, Utah and Washington. This gives you a comparison to a national sample.
11. Brief definitions of the risk and protective factors can be found following the graphs.
12. The tables provide more detailed information and are broken down by grade level. The combined category consists of all the grade levels represented in this report combined together (ie. if the report is based on $10^{\text {th }}$ and $12^{\text {th }}$ graders then the combined category will be all the $10^{\text {th }}$ and $12^{\text {th }}$ graders combined). For the tables on substance use, some substances also have a comparison to the Monitoring the Future (MTF) data. Monitoring the Future is an annual federally funded national survey of substance use across the country for students in grade 8, 10 and 12. For some substances and for some years or some grades, there is no corresponding MTF data. More information can be found at https://www.drugabuse.gov/drug-topics/trends-statistics/monitoring-future
13. The following abbreviations are sometimes used in the tables and charts due to space constraints:

ATOD stands for Alcohol, Tobacco and Other Drug Use.
ASB stands for Antisocial Behaviors.
PSI stands for Prosocial Involvement.
MTF stands for Monitoring the Future.

## Substances and Prevalence Periods Measured by APNA

Arkansas youth report on substance use of 19 substances. This report carries multiyear trend data, comparing this year's survey findings to up to four previous years of data gathered using similar survey questions. A few substances have been added throughout the years to reflect current usage trends; most recently added were synthetic marijuana and bath salts (2012), e-cigarettes (2014) and steroids (2020).

The report also carries data on lifetime vs 30-day substance use. Lifetime use (Ever Used), when a student reports having used a substance at least once, is typically viewed as a measure of youth experimentation of ATOD. In contrast, past 30-day use, (ie, when students report that they have used a substance at least once in the past 30 days), is viewed as the best measure of ongoing use of ATOD. For alcohol use, binge drinking is measured using a two-week prevalence period and e-cigarettes use is reported by frequency and amount used.
(Methods Note Regarding Long-Term Trend Data:)
Reports for the 2020 Arkansas Prevention Needs Assessment Survey were posted during the first week of March. During the third week of March, a code error resulting to non-standard procedures being used for calculating scores on the risk and protective factor questions was discovered. On further examination, it was discovered that this error had also been inadvertently used in 2017, 2018, 2019 reports. The variation in these procedures related to how missing data (i.e., instances where the student did not respond to a question) were counted. The effect was lowered calculated scores for some risk and protective factor prevalence estimates.

In this report, the computational methods used for the risk and protective factor score calculations have been adjusted to match standard score calculation procedures. In addition, to produce the most accurate long-term trend data possible, the 2017, 2018 and 2019 scores have been recalculated utilizing standard procedures.

Data for substance use and all other variables, other than the risk and protective factor scale, were unaffected by the non-standard procedures mentioned above, as the Risk and Protective Factor scores are calculated separately from the rest of the statistics in the report.

An impact assessment will be performed to further examine the scope of the change and will be made available once completed. Preliminary review suggests that overall impact on existing trends and prevention efforts will be minimal. The impact assessment will seek to verify the initial review.

Table 4.1: Risk and Protective Factor Scale Definition

| Community Domain Risk Factors |  |
| :--- | :--- |
| $\begin{array}{l}\text { Transitions } \\ \text { and Mobility }\end{array}$ | $\begin{array}{l}\text { Reseach has shown that transitions from school to school may } \\ \text { be accompanied by significant increases in rates of drug use, } \\ \text { school dropout and antisocial behavior. }\end{array}$ |

| $\begin{array}{l}\text { Perceived Availability } \\ \text { of Handguns }\end{array}$ | $\begin{array}{l}\text { The availability of handguns has also been related to the use of } \\ \text { these substances by adolescents. }\end{array}$ |
| Family Domain Risk Factors |  |
| $\begin{array}{l}\text { Poor Family } \\ \text { Management }\end{array}$ | $\begin{array}{l}\text { Parents' use of inconsistent and/or unusually harsh or severe } \\ \text { punishment with their children places them at higher risk for } \\ \text { substance use and other problem behaviors. Also, parents' fail- } \\ \text { ure to provide clear expectations and to monitor their children's } \\ \text { behavior makes it more likely that they will engage in drug abuse } \\ \text { whether or not there are family drug problems. }\end{array}$ |
| $\begin{array}{l}\text { Family History of } \\ \text { Antisocial Behavior }\end{array}$ | $\begin{array}{l}\text { When children are raised in a family with a history of problem } \\ \text { behaviors (e.g., violence or ATOD use), the children are more } \\ \text { likely to engage in these behaviors. }\end{array}$ |
| $\begin{array}{l}\text { Parental Attitudes } \\ \text { Favorable Toward }\end{array}$ | $\begin{array}{l}\text { In families where parents use illegal drugs, are heavy users of } \\ \text { alcohol, or are tolerant of children's use, children are more likely } \\ \text { to become drug abusers during adolescence. The risk is further } \\ \text { Dncreased if parents involve children in their own drug (or alco- }\end{array}$ |
| Dol) using behavior, for example, asking the child to light the |  |
| parent's cigarette or get the parent a beer from the refrigerator. |  |$]$

continued on the next column

Risk and Protective Factor Scale Definition (continued)

| School Domain Protective Factors <br> Prosocial <br> Involvement |  |
| :--- | :--- |
| Rewards for <br> Prosocial <br> Involvement | When young people are given more opportunities to participate <br> meaningfully in important activities at school, they are less likely <br> to engage in drug use and other problem behaviors. |
|  | When young people are recognized and rewarded for their contri- <br> butions at school, they are less likely to be involved in substance <br> use and other problem behaviors. |
| Early Initiation <br> of Drug Use | Individual/Peer Risk Factors <br> Early onset of drug use predicts misuse of drugs. The earlier the <br> onset of any drug use, the greater the involvement in other drug |
| use and the greater frequency of use. Onset of drug use prior to |  |
| the age of 15 is a consistent predictor of drug abuse, and a later |  |
| age of onset of drug use has been shown to predict lower drug |  |
| involvement and a greater probability of discontinuation of use. |  |$|$

continued on the next column

Risk and Protective Factor Scale Definition (continued)

| Low Perceived Risk <br> of Drug Use | Young people who do not perceive drug use to be risky are far <br> more likely to engage in drug use. |  |
| :--- | :--- | :---: |
| Rewards for <br> Antisocial <br> Involvement | Young people who receive rewards for their antisocial behavior <br> are at higher risk for engaging further in antisocial behavior and <br> substance use. |  |
| Individual/Peer Protective Factors |  |  |
| Religiosity | Young people who regularly attend religious services are less <br> likely to engage in problem behaviors. |  |

## 5. CHARTS AND TABLES

# Alcohol, Tobacco and Other Drug Use - Grade 6 Jefferson County 

A series of new vaping questions and steroids were added to the survey in 2020. Data comparison is not available for prior years.
Figure 5.1: Alcohol, Tobacco and Other Drug Use - Grade 6

Alcohol, Tobacco and Other Drug Use - Grade 10 Jefferson County

A series of new vaping questions and steroids were added to the survey in 2020. Data comparison is not available for prior years

## 6. AGE OF INITIATION

The Age of Initiation Profile looks specifically at student responses to the questions "How old were you when you first ...". The questions cover both first incidences of drug use (marijuana, cigarettes, alcohol, and regular use of alcohol) and first incidences of antisocial behaviors (suspension, arrest, carrying a gun, attacking someone and belonging to a gang). Possible responses to these questions range from age 10 to age 17 or the student can respond to the question with "Never". The average age figures are based only on those students who responded to the question with an answer other than "Never".

Table 6.1: Avg. Age of Initiation - Marijuana

## 7. STUDENT TOBACCO USE, EXPERIENCES AND PREVENTION SERVICES

Tobacco use is the leading preventable cause of death in the United States.
Arkansas youth typically have higher rates of tobacco use, including both cigarettes and smokeless tobacco, than the national average. Higher tobacco prevalence rates are common across the Southeast United States. This is due to a variety of cultural and economic factors that have traditionally supported greater tobacco use. The following table shows the results of the lifetime and past 30 day use of cigarettes, chewing tobacco and vaping nicotine.

Table 7.1: Cigarettes - Lifetime Use

## 8. STUDENT ELECTRONIC VAPOR PRODUCT USE AND EXPERIENCES

Surveillance on the growing popularity of the use and effects of products linked to vaping is an important area of study for educators across the country. Electronic cigarettes and vaping products (such as vaporizers, vape pens, hookah pens, electronic pipes) began emerging throughout US communities in 2006-2007 ${ }^{2}$ and appeared in schools several years later.

In 2014, Arkansas introduced its first series of questions on lifetime use of ecigarettes, e-cigars, and e-hookahs on the APNA questionnaire. At that time, students reported age of initiation at aged 14.5 years and e-cigarette use was reported by $18.7 \%$ of all students surveyed (Grades $8,10,12$ ), with more than a third ( $37.3 \%$ ) of $12^{\text {th }}$ graders reporting use in 2014. By 2019, age of initiation of e-cigarette had declined to age 13.8 years but, of all students, $24.7 \%$ reported using e-cigarettes and, among $12^{\text {th }}$ graders, almost half ( $41.5 \%$ ) said they used e-cigarettes, e-cigars or e-hookahs.

For the 2020 APNA survey, the question, "used e-cigarettes, e-cigars or e-hookahs (vaping)" was modified to "used a vaping product like e-cigarettes, e-cigars, or ehookahs" to capture the wider variety of products now available. In addition, new items have been added. Some vaping-related questions ask students about types of substances vaped: nicotine, marijuana, and flavoring; other questions ask about ease of getting substances and devices for vaping and reasons for vaping.

As shown for other questions on frequency of use, results from these questions are reported by grade level, total student responses, and total student responses compared with state levels of student use. With these results in hand, Arkansas' educators and administrators will be prepared to address what appears to be a rising tide of vaping among its students.

[^1]Table 8.1: What are the chances you would be seen as cool if you: used a vaping product like e-cigarettes, e-cigars, or e-hookahs?

|  |  | No or very little chance | Little chance | Some chance | Pretty good chance | Very good chance |

## 9. STUDENT COVID-19 FEELINGS AND EXPERIENCES

When the SARS-CoV-2 virus, known commonly as COVID-19, disturbed life, school, and work in the United States during early spring 2020, predictions about the course this virus would take, and its resulting impact, varied widely. This public health crisis and immediate health effects at local levels drove administrative decisions to close schools and offer learning approaches through remote and virtual platforms.

With the emergence of the virus and the uncertainty of how long the virus would be a threat, students and teachers have found themselves thrown into unique, untested, and unchartered waters. Your students have responded to some addirtional questions related to the COVID-19 pandemic to give you an honest look at how they perceive their learning experience to be affected by COVID-19, how well they think they are equipped to access lessons and learn in the new environment, and how safe they are from risk of infection.

Table 9.1: How safe would/do you feel returning to school at this time?

|  |  | Very Safe | Safe | Not Safe | Very Not <br> Safe |
| :--- | :--- | :---: | :---: | :---: | :---: |
| 6 | county | 19.1 | 34.0 | 27.7 | 19.1 |
|  | state | 24.4 | 51.7 | 16.9 | 7.0 |
| 10 | county | 10.2 | 59.8 | 19.7 | 10.2 |
|  | state | 17.5 | 49.0 | 24.2 | 9.3 |
| 12 | county | 16.5 | 43.0 | 29.8 | 10.7 |
|  | state | 20.1 | 45.3 | 23.8 | 10.8 |
| Combined | county | 14.2 | 48.8 | 25.1 | 11.9 |
|  | state | 21.1 | 49.3 | 21.0 | 8.6 |

Table 9.2: Do you prefer online classes or learning in school?

|  |  | Online <br> classes | At a school | No <br> Preference | I don't <br> know |
| :--- | :--- | :---: | :---: | :---: | :---: |
| 6 | county | 40.4 | 34.0 | 12.8 | 12.8 |
|  | state | 17.1 | 60.1 | 10.2 | 12.5 |
| 10 | county | 16.0 | 60.3 | 13.0 | 10.7 |
|  | state | 20.6 | 54.6 | 15.3 | 9.5 |
| 12 | county | 22.8 | 53.7 | 14.6 | 8.9 |
|  | state | 23.7 | 53.8 | 14.1 | 8.4 |
| Combined | county | 22.6 | 53.5 | 13.6 | 10.3 |
|  | state | 19.8 | 56.8 | 12.8 | 10.6 |

Table 9.3: Do you have enough access to school counseling services (ex. counselors who can help with mental health, feelings, or problems students may be experiencing)?

|  |  | Yes | No | I don't <br> know |
| :--- | :--- | :---: | :---: | :---: |
| 6 | county | 40.4 | 19.1 | 40.4 |

|  | state | 14.8 | 8.9 | 12.9 | 14.2 | 49.2 |

## 10. DRUG-FREE COMMUNITIES <br> SUPPORT PROGRAM CORE MEASURES

The Drug-Free Communities Support Program, administered by the Center for Substance Abuse Prevention, requests specific data which is typically referred to as the Core Measures of which there are currently four (30-Day Use, Perception of Risk, Parental Disapproval and Friends Disapproval). The drug categories measured are tobacco, alcohol, marijuana and prescription drugs. The first set of four tables found on the following page examines these measures broken down by grade level. The second set of four tables examines these measures broken down by gender. The meaning of the pct column will vary with each table and is described below. The $n$ column represents the number of students who responded to the question (i.e. sample size).

Past 30-Day Use The question "On how many occasions (if any) have you ... in the past 30 days?" is used to measure this statistic by reporting the percentage of students who report any use in the past 30 days.

Perception of Risk The question "How much do you think people risk harming themselves (physically or in other ways) if they ...?" is used to measure this statistic by reporting the percentage of students who report that using the drug is a "Moderate Risk" or a "Great Risk" to their health.

Perception of Parental Disapproval The question "How wrong do your parents feel it would be for you to ...?" is used to measure this statistic by reporting the percentage of students who report that parents would feel it is "Wrong" or "Very Wrong" to use tobacco, alcohol and marijuana.

Perception of Friends Disapproval The question "How wrong do your friends feel it would be for you to ...?" is used to measure this statistic by reporting the percentage of students who report that friends would feel it is "Wrong" or "Very Wrong" to use tobacco, alcohol and marijuana.

Table 10.1: Core Measure by Grade for Past 30 Day Use

| Grade | Cigarettes |  | Alcohol |  | Marijuana |  | Presc Drugs |  |
| :--- | :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  | pct | n | pct | n | pct | n | pct | n |

12. 2020 APNA SURVEY
Arkansas Prevention Needs Assessment Student Survey

| 20. | Putting them all together, what were your grades like last year? |  |
| :---: | :---: | :---: |
|  | $\bigcirc$ Mostly F's | O Mostly B's |
|  | $\bigcirc$ Mostly D's | $\bigcirc$ Mostly A's |
|  | $\bigcirc$ Mostly C's |  |
| 21. | How important do you think the things you are learning in school are going to be for your later life? |  |
|  | $\bigcirc$ Very important | $\bigcirc$ Slightly important |
|  | $\bigcirc$ Quite important | $\bigcirc$ Not at all important |
|  | $\bigcirc$ Fairly important |  |
| 22. | During the LAST FOUR WEEKS how many whole days of school have you missed because you skipped or "cut"? |  |
|  | $\bigcirc$ None | - 4-5 |
|  | - 1 | 6-10 |
|  | $\bigcirc 2$ | - 11 or more |
|  | $\bigcirc 3$ |  |

The next questions ask about your feelings and experiences
in other parts of your life.

30. How often do you attend religious services or

31. Have you ever used smokeless
Have you ever used smokeless tobacco (chew, snuff,
plug, dipping tobacco, or chewing tobacco)?
O Never
Once or twice
Once in a while but not regularly
Regularly in the past
Regularly in the past
Regularly now
32. How often have you used smokeless tobacco during
the past 30 days?
Not at all
Once or twice
Once or twice per week
About once a day
More than once a day
33. Have you ever smoked cigarettes?
O Never
Once or twice
Once in a while
Regularly in the past
34. How frequently have you smoked cigarettes during
the past 30 days?
Not at all
Less than one cigarette per day
One to five cigarettes per day
Less than one cigarette per day
One to five cigarettes per day
About one-half pack per day
About one pack per day
About one and one-half packs per day
Awo packs or more per day
Which statement best describes rules about smoking
Smoking is not allowed anywhere inside the home or cars
Smoking is allowed in some places and at some times or
in some cars
Smoking is allowed anywhere inside the home or cars
There are no rules about smoking inside the home or cars
I don't know
36. During this school year, were you taught in any of i. vape an e-liquid
occasionally?
j. vape an e-liquid
28. Have you ever belonged to a gang?
No, but would like
Yes, in the past

| g. use non-prescription drugs to get high? |  |  |  |
| :--- | :--- | :--- | :--- |
| h. use a vaping product like e-cigarettes, |  |  |  |

e-cigars and e-hookahs?

## think people risk harming themselves (physically or in other ways) if they: <br> N <br> ways) if they <br> 

a. been suspended from school?
b. carried a handgun?
 stolen or tried to steal a motor vehicle

| such as a car or motorcycle? |
| :--- |
| e. participated in clubs, organiza |

| activities at school? |
| :---: |
| f. been arrested? |

| f. been arrested? |
| :--- |
| g. attacked someone with the idea of |

h. been drunk or high at school?
i. taken a handgun to school?
j. used a vaping product like e-cis?
e-cigars, or e-hookahs?
e-cigars, or e-hookahs?

## per day?

c. smoke marijuana once or twice a week? d. beverage (beer, wine, liquor) nearly every
e. have five or more drinks of an alcoholic
beverage once or twice a weekend?
f. use prescription drugs that are not
prescribed to them?
e-cigars and e-hookahs? $\qquad$
$\bigcirc$ Never
Rarely

## Almost always

29. If you have ever belonged to a gang, did that gang have
a name?
$\bigcirc$ No
$\bigcirc$ Yes
Yes, belong now
Yes, but would like to get out
I have never belonged to a gang

\hline \& O4 or 5 times \& - Don't know or can't say <br>
\hline \& 6 or more times \& <br>
\hline
\end{tabular}

[^2]The following questions ask about substances ever used in your lifetime.
On how many occasions (if any) have you:

## 79. If you smoked cigarettes (not just a puff or drag) in the $\quad$ 81. What have been the most important reasons for you to

vape? (Mark all that apply.)
I have not vaped
To help me quit regular cigarettes
To help me quit regular cigarettes
Because regular cigarette use is not
Because regular cigarette use is not permitted
To experiment - to see what it's like O To relax or relieve tension
O To feel good or get high
Because it looks cool
To have a good time with my friends
Because of boredom, nothing else to do
Because it tastes good
Because I am "hooked" - I have to have it
During the last month, about how many marijuana
cigarettes, or the equivalent, did you smoke a day, on cigarettes, or the equivalent, did you smoke a day, on
count only the amount YOU smoked.)
4-6 a day
Less than 1 a day $\quad 0$ 7-10 a day
1 a day
$02-3$ day

| I got them on the Internet | $\begin{array}{l}\text { 83. If you used marijuana (weed, pot) (not just a puff or drag) } \\ \text { in the past year, how did you get it? (Mark all that apply.) } \\ \text { I got them at a store that sells electronic cigarettes, such } \\ \text { as a "vape shop" }\end{array}$ |
| :--- | :--- |
| $\begin{array}{l}\text { I got them from a family member } \\ \text { I got them from a friend not use marijuana in the past year }\end{array}$ |  |
| A stranger got them for me | I bought it myself |
| I took them from a store or shop | I got it from someone at school |
| I got them some other way | I got it from someone with a medical marijuana card |

If you smoked cigarettes (not just a puff or drag)
past year, how did you get them? (Mark all that apply.)
I did not smoke cigarettes in the past year
I bought them myself with a fake ID
I bought them myself with a fake ID
I got them from someone I know age 18 or older
I got them from someone I know under age 18
I got them from home with my parents' permission
I got them from home without my parents' permission I got them from another relative

I took them from a store or shop

## 

 or e-hookahs (not just a puff or drag) in the past year,how did you get them? (Mark all that apply.)

O did not use e-cigarettes, e-cigars, or e-hookahs in the
I bought them in a store such as a convenience store,
supermarket, discount store, or gas station
I got them on the Internet
๐்

him/her?

## 13. FREQUENCY DISTRIBUTION TABLES

This section contains frequency distribution tables for all questions found on the 2020 Arkansas Prevention Needs Assessment Survey (APNA) Survey. The tables appear in the same order as the questions on the survey. The tables include breakdowns by grade level as well as combined percentages. The $N$ of Valid row is a frequency count of the number of valid responses to each question for each grade and overall. The $N$ of Miss row is a frequency count of the number of invalid(marked more than one response) or missing (i.e. did not respond) responses to each question for each grade and overall.

For the questions that allowed more than one response (i.e. race, live with, etc.) each response becomes a separate table. If a student did not mark the response, that was counted as a NO response, if they did mark the response, that was counted as a YES response, and if none of the responses were selected each was set to missing.

Table 13.9: Are you:

|  | Grade 6 |  | Grade 10 |  | Grade 12 |  | Combined |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | County \% | State \% | County \% | State \% | County \% | State \% | County \% | State \% |
| Male | 38.5 | 50.0 | 49.6 | 48.9 | 53.0 | 48.5 | 47.9 | 49.3 |
| Female | 61.5 | 50.0 | 50.4 | 51.1 | 47.0 | 51.5 | 52.1 | 50.7 |
| $N$ of Valid | 96 | 13,182 | 135 | 10,127 | 132 | 6,843 | 363 | 30,152 |
| $N$ of Miss | 4 | 655 | 9 | 510 | 5 | 292 | 18 | 1,457 |

Table 13.10: How old are you?

|  | Grade 6 |  | Grade 10 |  | Grade 12 |  | Combined |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
