## 1. INTRODUCTION

This report summarizes findings from the Arkansas Prevention Needs Assessment Survey (APNA), a survey of $6^{\text {th }}, 8^{\text {th }}, 10^{\text {th }}$ and $12^{\text {th }}$ grade school students, conducted in fall 2022. This survey was available free of charge to all Arkansas public school districts that chose to participate. The survey was designed to assess adolescent substance use and related behaviors, and risk and protective factors that predict these behaviors. In this report, the results are presented for each grade along with the overall results for the State. Table 1.1 provides information on the total number of students and the number of students in the county. Table 1.2 provides information on the number and percent of students at each grade. Table 1.3 provides information on the number and percent of students by sex. Table 1.4 provides information on the number and percent of students by ethnic origin.

The APNA Survey was first administered in fall 2002 and has been administered in the fall of each school year since then. Because trends over time are very important to prevention planning, readers are encouraged to review the results from the previous surveys. By comparing the results of the previous surveys, changes in alcohol, tobacco and other drugs (ATOD) use, rates of antisocial behavior (ASB), and levels of risk and protective factors can be determined for a specific grade. Together, the results of the current and past APNA surveys provide a complete picture of ATOD use, antisocial behavior, and risk and protective factors for students in Arkansas.

### 1.1 The Risk and Protective Factor Model of Prevention

Arkansas uses the Risk and Protective Framework to guide prevention efforts aimed at reducing youth problem behaviors. This framework, developed by J. David Hawkins, PhD, Richard F. Catalano, PhD, and their colleagues at the University of Washington, Social Development Research Group, explains the relationship between risk and protective factors and youth problem behaviors. A total of 15 risk factors and 2 protective factors from this framework were measured in the 2022 APNA survey.

Risk and protective factor-focused prevention is based on a simple premise: To prevent a problem from happening, we need to identify the factors that increase the risk of that problem developing and then find ways to reduce the risks. Just as medical researchers have found risk factors for heart attacks such as diets high in fats, lack of exercise, and smoking, a team of researchers, the Social Development Research Group (SDRG), at the University of Washington, have defined a set of risk factors for drug abuse. The research team also found that some children exposed to multiple risk factors manage to avoid behavior problems later even though they were exposed to the same risks as children who exhibited behavior problems. Based on research, they identified protective factors and processes that work together to buffer children from the effects of high risk exposure and lead to the development of healthy behaviors.

Risk factors include characteristics of school, community, and family environments, as well as characteristics of students and their peer groups that are known to predict increased likelihood of drug use, delinquency, and violent behaviors among youth ${ }^{1}$.

[^0]
### 1.2 The COVID-19 Pandemic Impact on the APNA Survey

In fall of 2022 most schools were engaged in full-time in person learning for most students. However, long term impacts due to COVID-19 persist and data collected can assist in understanding some of those impacts. The statewide survey participation rates continued to be lower than recent survey years, survey participation for this current year (2022) was 52,777 valid surveys, representing a $4.8 \%$ decrease from the previous year.

As you read and make use of the data in this report, please keep in mind a few impacts of these unique learning and testing environments driven by the pandemic:

1. Comparisons between 2022 and previous years should be assessed with caution; for counties with low levels of responses, the results can be interpreted as trends that can be verified with future data.
2. The specific participating schools in each county are often different between years; comparisons between annual data should consider this differential when seeking comparisons.
3. For most counties, the data remain reliable and representative of general substance use and other behaviors of the students in your county.

Also, to provide data on the impact of the pandemic, the 2022 APNA includes a battery of survey items to gather data on the students' perspectives on: safety for returning to school during the pandemic; preference for online vs learning in school; remote access to school services; relationships and homelife during the pandemic; social distancing practices; and feelings of depression during the pandemic. This snapshot will assist Arkansas' educators in understanding how the pandemic has affected the learning environment and the students who access it.

## 2. HOW TO READ THE CHARTS AND TABLES

1. Student responses for risk and protective factors, substance use and antisocial behavior questions are displayed by grade on the following pages.
2. Risk and Protective factors are grouped into 4 domains: community, family, school, and peer-individual.
3. Vertical bars represent the percent of students in the grade who reported elevated risk or protection, substance use, antisocial behaviors or school safety concerns.
4. Scanning across these charts, you can easily determine which factors are most (or least) prevalent, thus identifying which are the most important for your community to address.
5. The charts show 2 bars for each data point representing 2 years of data with the most current year in red on the right and the previous year in blue to the left. Those bars will be complemented by a small dash. The dash shows the comparison from the state and provides additional information for you in determining the relative importance of each risk or protective factor.
6. A dashed line on each risk and protective factor chart represents the percentage of youth at risk or with protection for the seven state sample upon which the cut-points were developed. The seven states included in the norm group were Colorado, Illinois, Kansas, Maine, Oregon, Utah and Washington.
7. Brief definitions of the risk and protective factors can be found following the graphs.
8. The tables provide more detailed information and are broken down by grade level. The combined category consists of all the grade levels represented in this report combined together (ie. if the report is based on $10^{\text {th }}$ and $12^{\text {th }}$ graders then the combined category will be all the $10^{\text {th }}$ and $12^{\text {th }}$ graders combined). For the tables on substance use, some substances also have a comparison to the Monitoring the Future (MTF) data. Monitoring the Future is an annual federally funded national survey of substance use across the country for students in grade 8, 10 and 12 . For some substances and for some years or some grades, there is no corresponding MTF data. More information can be found at https://www.drugabuse.gov/drug-topics/trends-statistics/monitoring-future
9. The following abbreviations are sometimes used in the tables and charts due to space constraints:

ATOD stands for Alcohol, Tobacco and Other Drug Use.
ASB stands for Antisocial Behaviors.
PSI stands for Prosocial Involvement.
MTF stands for Monitoring the Future.

## Substances and Prevalence Periods Measured by APNA

Arkansas youth report on substance use of 17 substances. This report carries multiyear trend data, comparing this year's survey findings to up to four previous years of data gathered using similar survey questions. A few substances have been added throughout the years to reflect current usage trends. In 2012, synthetic marijuana (later removed in 2021) and bath salts were added; e-cigarettes were added in 2014; steroids and vaping products were added in 2020; and CBD products were added in 2021.

The report also carries data on lifetime vs 30-day substance use. Lifetime use (Ever Used), when a student reports having used a substance at least once, is typically viewed as a measure of youth experimentation of ATOD. In contrast, past 30-day use, (i.e., when students report that they have used a substance at least once in the past 30 days), is viewed as the best measure of ongoing use of ATOD. For alcohol use, binge drinking is measured using a two-week prevalence period and vaping product use is reported by frequency and amount used.

Table 2.1: Risk and Protective Factor Scale Definition

| Community Domain Risk Factors |  |  |  |
| :--- | :--- | :---: | :---: |
| Transitions <br> and Mobility | Research has shown that transitions from school to school may <br> be accompanied by significant increases in rates of drug use, <br> school dropout and antisocial behavior. |  |  |
| Perceived Availability <br> of Drugs | The availability of cigarettes, alcohol, marijuana, and other il- <br> legal drugs has been related to the use of these substances by <br> adolescents. |  |  |
| Perceived Availability <br> of Handguns | The availability of handguns has also been related to the use of <br> these substances by adolescents. |  |  |
| Family Domain Risk Factors |  |  |  |
| Poor Family <br> Management | Parents' use of inconsistent and/or unusually harsh or severe <br> punishment with their children places them at higher risk for <br> substance use and other problem behaviors. Also, parents' fail- <br> ure to provide clear expectations and to monitor their children's <br> behavior makes it more likely that they will engage in drug abuse <br> whether or not there are family drug problems. |  |  |
| Family History of <br> Antisocial Behavior | When children are raised in a family with a history of problem <br> behaviors (e.g., violence or ATOD use), the children are more <br> likely to engage in these behaviors. |  |  |
| Parental Attitudes <br> Favorable Toward <br> Drug Use | In families where parents use illegal drugs, are heavy users of <br> alcohol, or are tolerant of children's use, children are more likely <br> to become drug abusers during adolescence. The risk is further |  |  |
| increased if parents involve children in their own drug (or alco- |  |  |  |
| hol) using behavior, for example, asking the child to light the |  |  |  |
| parent's cigarette or get the parent a beer from the refrigerator. |  |  |  |$|$

continued on the next column

Risk and Protective Factor Scale Definition (continued)

| School Domain Protective Factors |  |
| :--- | :--- |
| Opportunities for <br> Prosocial <br> Involvement | When young people are given more opportunities to participate <br> meaningfully in important activities at school, they are less likely <br> to engage in drug use and other problem behaviors. |
| Rewards for <br> Prosocial <br> Involvement | When young people are recognized and rewarded for their contri- <br> butions at school, they are less likely to be involved in substance <br> use and other problem behaviors. |
| Individual/Peer Risk Factors |  |\(\left|\begin{array}{l}Early onset of drug use predicts misuse of drugs. The earlier the <br>

of Drutiation Use of any drug use, the greater the involvement in other drug <br>
one and the greater frequency of use. Onset of drug use prior to <br>
the age of 15 is a consistent predictor of drug abuse, and a later <br>
age of onset of drug use has been shown to predict lower drug <br>
involvement and a greater probability of discontinuation of use.\end{array}\right|\)
continued on the next column

Risk and Protective Factor Scale Definition (continued)

| Low Perceived Risks <br> of Drug Use | Young people who do not perceive drug use to be risky are far <br> more likely to engage in drug use. |
| :--- | :--- |
| Peer Rewards for <br> Antisocial Behavior | Young people who receive rewards for their antisocial behavior <br> are at higher risk for engaging further in antisocial behavior and <br> substance use. |

*The response 'I did not drink alcohol in the past year' has been removed from this table.

## Sources of Alcohol

If you drank alcohol (not just a sip or taste) in the past year, how did you get it?

Table 3.78: Source of Alcohol - I did not drink alcohol in the past year

## 4. AGE OF INITIATION

The Age of Initiation Profile looks specifically at student responses to the questions "How old were you when you first ...". The questions cover both first incidences of drug use (marijuana, cigarettes, alcohol, and regular use of alcohol) and first incidences of antisocial behaviors (suspension, arrest, carrying a gun, attacking someone and belonging to a gang). Possible responses to these questions range from age 10 to age 17 or the student can respond to the question with "Never". The average age figures are based only on those students who responded to the question with an answer other than "Never".

## 5. STUDENT TOBACCO USE, EXPERIENCES AND PREVENTION SERVICES

Tobacco use is the leading preventable cause of death in the United States.
Arkansas youth typically have higher rates of tobacco use, including both cigarettes and smokeless tobacco, than the national average. Higher tobacco prevalence rates are common across the southeastern United States. This is due to a variety of cultural and economic factors that have traditionally supported greater tobacco use. The following table shows the results of the lifetime and past 30 day use of cigarettes, chewing tobacco and vaping nicotine.

Table 5.1: Cigarettes - Lifetime Use

| Grade | Group | $\mathbf{2 0 1 9 - 2 0}$ | $\mathbf{2 0 2 0 - 2 1}$ | $\mathbf{2 0 2 1 - 2 2}$ | $\mathbf{2 0 2 2 - 2 3}$ |

## 6. STUDENT ELECTRONIC VAPOR PRODUCT USE AND EXPERIENCES

Surveillance on the growing popularity of the use and effects of products linked to vaping is an important area of study for educators across the country. Electronic cigarettes and vaping products (such as vaporizers, vape pens, hookah pens, electronic pipes) began emerging throughout US communities in 2006-2007 ${ }^{2}$ and appeared in schools several years later.

In 2014, Arkansas introduced its first series of questions on lifetime use of ecigarettes, e-cigars, and e-hookahs on the APNA questionnaire. At that time, students reported age of initiation at aged 14.5 years and e-cigarette use was reported by $18.7 \%$ of all students surveyed (Grades $8,10,12$ ), with more than a third ( $37.3 \%$ ) of $12^{\text {th }}$ graders reporting use in 2014. By 2019, age of initiation of e-cigarette had declined to age 13.8 years; in addition, $24.7 \%$ of all students reported using ecigarettes and, among $12^{\text {th }}$ graders, $41.5 \%$ said they used e-cigarettes, e-cigars or e-hookahs.

For the 2020 APNA survey, the question, "used e-cigarettes, e-cigars or e-hookahs (vaping)" was modified to "used a vaping product like e-cigarettes, e-cigars, or ehookahs" to capture the wider variety of products now available. In addition, new items have been added. Some vaping-related questions ask students about types of substances vaped: nicotine, marijuana, and flavoring; other questions ask about ease of getting substances and devices for vaping and reasons for vaping.

As shown for other questions on frequency of use, results from these questions are reported by grade level, total student responses, and total student responses compared with state levels of student use. With these results in hand, Arkansas' educators and administrators will be prepared to address what appears to be a rising tide of vaping among its students.

[^1]Table 6.1: What are the chances you would be seen as cool if you: used a vaping product like e-cigarettes, e-cigars, or e-hookahs?

$\left.\begin{array}{llccc}\hline & & & & \begin{array}{c}\text { I don't } \\ \text { have any } \\ \text { brothers or }\end{array} \\ \text { sisters }\end{array}\right]$

## 7. STUDENT-REPORTED COVID-19 FEELINGS AND EXPERIENCES

When the SARS-CoV-2 virus, known commonly as COVID-19, disturbed life, school, and work in the United States during early spring 2020, predictions about the course this virus would take, and its resulting impact, varied widely. This public health crisis and immediate health effects at local levels drove administrative decisions to close schools and offer learning approaches through remote and virtual platforms.

With the emergence of the virus and the uncertainty of how long the virus would be a threat, students and teachers have found themselves thrown into unique, untested, and unchartered waters. By the 2021-22 school year, vaccination and other measures worked toward reducing COVID-19 incidence rate and most schools were able to reopen for in-school learning. However, with COVID cases still a threat, students exposed to COVID-positive individuals were unable to attend in-school classes and accessed learning through the remote portals setup in 2020. The 2022 APNA survey continues to capture data about the pandemic and it's impacts with the additional questions added in 2020. Student responses to these questions will give you an honest look at how they perceive their learning experience to be affected by COVID19 , how well they think they are equipped to access lessons and learn in uncertain environments, how safe they think they are from risk of infection, and how they assess their own mental health.

Table 7.1: How safe would/do you feel returning to school at this time?
\(\left.\begin{array}{llcccc}\hline \& \& \& \& Very Not <br>

Vafe\end{array}\right]\)|  | Very Safe | Safe | Not Safe | Santy | 30.8 |
| :--- | :--- | :---: | :---: | :---: | :---: |
| 59.6 | 5.8 | 3.8 |  |  |  |
| 6 | state | 29.9 | 50.4 | 14.8 | 4.9 |
| 8 | county | 37.9 | 47.0 | 15.2 | 0.0 |
|  | state | 25.2 | 54.5 | 16.1 | 4.3 |
| Combined | county | 34.7 | 52.5 | 11.0 | 1.7 |
|  | state | 27.4 | 52.6 | 15.5 | 4.6 |

Table 7.2: Do you prefer online classes or learning in school?

|  |  | Online <br> classes | At a school | No <br> Preference | I don't <br> know |
| :--- | :--- | :---: | :---: | :---: | :---: |
| 6 | county | 14.8 | 66.7 | 7.4 | 11.1 |
|  | state | 18.8 | 56.0 | 12.2 | 12.9 |

|  | State | 15.2 | 9.1 | 11.4 | 14.9 | 49.3 |

## 8. CORE MEASURES OF THE DRUG-FREE COMMUNITIES PROGRAM

The Drug-Free Communities Support Program, administered by the Center for Substance Abuse Prevention, requests specific data which is typically referred to as the Core Measures of which there are currently four (30-Day Use, Perception of Risk, Parental Disapproval and Friends Disapproval). The drug categories measured are tobacco, alcohol, marijuana and prescription drugs. The first set of four tables found on the following page examines these measures broken down by grade level. The second set of four tables examines these measures broken down by gender. The meaning of the pct column will vary with each table and is described below. The $n$ column represents the number of students who responded to the question (i.e. sample size).

Past 30-Day Use The question "On how many occasions (if any) have you ... in the past 30 days?" is used to measure this statistic by reporting the percentage of students who report any use in the past 30 days.

Perception of Risk The question "How much do you think people risk harming themselves (physically or in other ways) if they ...?" is used to measure this statistic by reporting the percentage of students who report that using the drug is a "Moderate Risk" or a "Great Risk" to their health.

Perception of Parental Disapproval The question "How wrong do your parents feel it would be for you to ...?" is used to measure this statistic by reporting the percentage of students who report that parents would feel it is "Wrong" or "Very Wrong" to use tobacco, alcohol and marijuana.
Perception of Friends Disapproval The question "How wrong do your friends feel it would be for you to ...?" is used to measure this statistic by reporting the percentage of students who report that friends would feel it is "Wrong" or "Very Wrong" to use tobacco, alcohol and marijuana.

Table 8.1: Core Measure by Grade for Past 30 Day Use

| Grade | Cigarettes |  | Alcohol |  | Marijuana |  | Presc Drugs |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  | pct | n | pct | n | pct | n | pct | n |
| Grade 6 | 0.0 | 54 | 1.9 | 54 | 0.0 | 54 | 0.0 | 53 |
| Grade 8 | 1.4 | 70 | 6.9 | 72 | 2.8 | 72 | 5.6 | 72 |
| Combined | $\mathbf{0 . 8}$ | $\mathbf{1 2 4}$ | $\mathbf{4 . 8}$ | $\mathbf{1 2 6}$ | $\mathbf{1 . 6}$ | $\mathbf{1 2 6}$ | $\mathbf{3 . 2}$ | $\mathbf{1 2 5}$ |

Table 8.2: Core Measure by Grade for Perception of Risk

| Grade | Cigarettes |  | Alcohol |  | Marijuana |  | Presc Drugs |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  | pct | n | pct | n | pct | n | pct | n |
| Grade 6 | 75.9 | 54 | 63.6 | 55 | 56.0 | 50 | 76.5 | 51 |
| Grade 8 | 88.4 | 69 | 64.3 | 70 | 55.9 | 68 | 89.6 | 67 |
| Combined | $\mathbf{8 2 . 9}$ | $\mathbf{1 2 3}$ | $\mathbf{6 4 . 0}$ | $\mathbf{1 2 5}$ | $\mathbf{5 5 . 9}$ | $\mathbf{1 1 8}$ | $\mathbf{8 3 . 9}$ | $\mathbf{1 1 8}$ |

Table 8.3: Core Measure by Grade for Parental Disapproval

| Grade | Tobacco |  | Alcohol |  | Marijuana |  |  | Presc Drugs |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  | pct | n | pct | n | pct | n | pct | n |
| Grade 6 | 100.0 | 54 | 100.0 | 54 | 100.0 | 54 | 98.1 | 54 |
| Grade 8 | 97.1 | 69 | 92.8 | 69 | 98.6 | 69 | 97.1 | 69 |
| Combined | 98.4 | 123 | 95.9 | 123 | 99.2 | 123 | 97.6 | 123 |

Table 8.4: Core Measure by Grade for Friends Disapproval

| Grade | Tobacco |  | Alcohol |  | Marijuana |  |  | Presc Drugs |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | :---: |
|  | pct | n | pct | n | pct | n | pct | n |  |
| Grade 6 | 96.4 | 55 | 94.5 | 55 | 94.5 | 55 | 94.5 | 55 |  |
| Grade 8 | 85.5 | 69 | 85.7 | 70 | 84.1 | 69 | 89.9 | 69 |  |
| Combined | $\mathbf{9 0 . 3}$ | $\mathbf{1 2 4}$ | $\mathbf{8 9 . 6}$ | $\mathbf{1 2 5}$ | $\mathbf{8 8 . 7}$ | $\mathbf{1 2 4}$ | $\mathbf{9 1 . 9}$ | $\mathbf{1 2 4}$ |  |

Table 8.5: Core Measure by Sex for Past 30 Day Use

| Sex | Cigarettes |  | Alcohol |  | Marijuana |  | Presc Drugs |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  | pct | n | pct | n | pct | n | pct | n |
| Male | 0.0 | 59 | 6.7 | 60 | 3.3 | 60 | 3.4 | 59 |

## 9. PREVENTION RESOURCES

### 9.1 Regional Prevention Provider Contact List

Region 1 -- Benton, Carroll, Madison, Washington
Community Clinic -- (479) 751-7417 Fax: (479) 751-4898
Address: 614 E. Emma Avenue, Suite M426
Springdale, AR 72764
Laurie Reh -- laurie.reh@communityclinicnwa.org
Codi McCuistion -- codi.mccuistion@communityclinicnwa.org
Region 2 -- Baxter, Boone, Marion, Newton, Searcy
North Arkansas Partnership for Health Education
NARMC/NAPHE
Address: 825 N. Main Street, Suite 7
Harrison, AR 72601
Cell: 870-688-8352
Chrissie Larchez -- christine.larchez@northark.edu
Region 3 -- Cleburne, Fulton, Independence, Izard, Jackson, Sharp, Stone, Van Buren, White, Woodruff
Crowley's Ridge Development Council -- (870) 269-6105
Physical Address: 1708 E. Main Street
P.O. Box 2733

Mountain View, AR 72560
Margaret Morrison -- mmorrison@crdcnea.com Cell: (870) 819-6970
Barbara Hacker -- bhacker@crdcnea.com
Addresss: 2485 Harrison Street, Suite 5, Batesville, AR 72501
Shawn Vonwiller -- svonwiller@crdcnea.com Cell: (870) 819-7349
Region 4 -- Clay, Craighead, Greene, Lawrence, Mississippi, Poinsett, Randolph
Crowley's Ridge Development Council -- (870) 933-0033
Address: 2401 Fox Meadows Lane
Jonesboro, AR 72404
Shamal Carter -- asaidou@crdcnea.com

Region 5 -- Crawford, Franklin, Logan, Polk, Scott, Sebastian
Harbor House -- (479) 652-5072 (Tabitha) or (479) 259-5549 (Katie)
Shipping Address: 3900 Armour Ave.
Fort Smith, AR 72904
Physical Address: 101 North 10th Street, Suite C
Fort Smith, AR 72901
Tabitha Fondren -- tfondren@recoveryhhi.org
Katie Priest -- kpriest@recoverhhi.org

Region 6 -- Conway, Faulkner, Johnson, Perry, Pope, Yell
Community Service Inc. -- (501) 354-4589 Fax: (501) 354-5410
Physical Address: 100 South Cherokee, Morrilton, AR 72110
Mailing Address: PO BOX 679, Morrilton, AR 72110
Shannon Cook -- scook@csiyouth.com
Address: 1505 South Oswego Avenue, Russellville, AR 72802
Office: (479) 967-3370 Fax: (479) 967-2775
Amy Mellick -- amellick@csiyouth.com
Region 7 -- Crittendon, Cross, Lee, Monroe, Phillips, St. Francis
Crowley's Ridge Development Council
Address: 593 Highway 243
Marianna, AR 72360
Kendon Gray -- kendon@crdcnea.com Cell: (870) 819-7756
Region 8 -- Clark, Garland, Hot Springs, Montgomery, Pike
Ouachita Children, Youth \& Family Services -- (501) 282-6211
Address: 1401 Malvern Avenue, Suite 22
Hot Springs, AR 71901
Anthony Tidwell -- atidwell@occnet.org Cell: (501) 915-4050

## Region 9 -- Lonoke, Prairie, Pulaski, Saline

& \text { I got them some other way }
\end{aligned}
$$

1. What have been the most important reasons for
you to vape? (Choose all that apply.)

O I have not vaped
To help me quit regular cigarettes Because regular cigarette use is not permitted
To experiment - to see what it's like To experiment - to see what it's like
To relax or relieve tension To feel good or get high

Because it looks cool
To have a good time with my friends
Because of boredom, nothing else to do
Because of boredom, nothing else to do
Because it tastes good
Because I am "hooked" - I have to have it
82. During the last month, about how many marijuan

## 11. FREQUENCY DISTRIBUTION TABLES

This section contains frequency distribution tables for all questions found on the 2022 Arkansas Prevention Needs Assessment Survey (APNA) Survey. The tables appear in the same order as the questions on the survey. The tables include breakdowns by grade level as well as combined percentages. The $N$ of Valid row is a frequency count of the number of valid responses to each question for each grade and overall. The $N$ of Miss row is a frequency count of the number of invalid(marked more than one response) or missing (i.e. did not respond) responses to each question for each grade and overall.

For the questions that allowed more than one response (i.e. race, live with, etc.) each response becomes a separate table. If a student did not mark the response, that was counted as a NO response, if they did mark the response, that was counted as a YES response, and if none of the responses were selected each was set to missing.

Table 11.9: Are you:

|  | Grade 6 |  | Grade 8 |  | Combined |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
